

IMPROVING CARE

Manage Revenue with Confidence

Designed to specifically enhance billing processes and increase cash flow for long term care providers.

>>> UB Watch™ detects and reveals unintended billing patterns which can lead to suspended claims, CMS audits, government demand for repayments, False Claim Act issues, under/over billing, and other missed opportunities which may result in lower revenue.

Using a system of logic flags designed specifically for Universal Bills claims, the program methodically reviews each UB prior to submission to the fiscal intermediary and alerts providers to any inconsistencies or potential compliance issues which may delay payment or decrease revenue. With UB Watch™ and CareWatch®, companies can coordinate clinical MDS and financial UB records, track patterns and trends, and meet both customer and government expectations that services and reimbursement are in balance.

UBWatch™ can help your facility:

- Ensure Correct Reimbursement
- Evaluate and Improve UB-04 Claims
- Coordinate Clinical MDS & Financial UB Records
- Detect Unintended Billing Patterns
- Minimize Audit Risk

Unparalleled Training and Support

- Subscription Includes Email and Telephone Support
- Onsite or Web-Based Training is Included in the Implementation Fee
- Updates are Added Automatically
- Monthly Support Bulletin

eHDS Products are HIPAA Compliant and Provide Disclosure Accounting.

eHealth Data Solutions is committed to serving the long term care industry by providing innovative web-based tools for information and data management. Our solutions support evidence-based decision processes that increase productivity, reduce risk, and improve quality through cost effective, resident centered care and services.
